

# LIVEsciences at a glance

---

## Catalyse success with us

---

Our mission is to contribute to a more sustainable world by catalysing the success within the corporate world. We are keen to be measured on the realised outcomes catalysed by our support.

LIVEsciences was founded by Frank, Timm and Steffen in April 2016 with a strong belief that we can **make the corporate world a better one!** Today we are a team of seven curious, passionate and experienced catalysts.

## Our Passion

---

**Unleashing** the **potential** of people in the Life Sciences Industry is our passion.

We strive to find the best mix of seeding and „rootical“ (radical from the root) approaches in the context of the market and your culture. A more self-organizing agile culture is the best environment to facilitate innovation and growth within this fast-changing world.

- ◇◇ We think it is important to develop specific solutions together with our clients rather than providing unified frameworks
- ◇◇ We will catalyse Success with you in a Do It Yourself (DIY) way - educating you in problem solving techniques and explaining themes that challenges have in common
- ◇◇ We will free up spaces for you to plant the new ideas, by documenting complex problems in an easy way and helping you to break it down in next steps
- ◇◇ You are given advice in learning industry patterns and how to master these obstacles, ultimately reducing consulting costs substantially

## What we offer

---

- |  |  |
|--|--|
| ◇◇ Organizational Design (Agility, Responsive Org, Teal) | ◇◇ Teal Safaris (inspirational event about agility, responsive org, new ways of working) |
| ◇◇ Resilient Culture                                     | ◇◇ Coaching Circles  |
